

PRESS RELEASE

FOR IMMEDIATE RELEASE: May 31th 2007

eLeader announces 500-user deployment in Brazil.

Lublin, Poland, May 31th 2007 - eLeader recently deployed the eLeader.Mobile 4G-Series smartphone solution in Brazil for a Fortune 500 company. The Portuguese version of the system supports more than five hundred users across three time zones. The customer chose Nokia S60 devices as the mobile terminals used in the field.

The solution has streamlined retail-channel sales processes, and was integrated with the Customer's existing business intelligence system.

More information about eLeader's solutions can be found at www.eleader.eu.

About eLeader

eLeader is a software house focused on smartphone technologies and a pioneer of advanced IT solutions for streamlining business processes using the smartphones of mobile employees.

Early focus on the leading Symbian Series 60 (Nokia S60) smartphone platform allowed eLeader to be one of the first companies in the world providing advanced enterprise software for Nokia smartphones. eLeader has successfully implemented its software for many top companies around the globe in a variety of industries, languages and time zones.

Today, eLeader offers a range of advanced Symbian-based products using the mature eLeader 4G technology, allowing the deployment of secure, transactional, and data-synchronized client/server solutions that overcome the functional limitations normally associated with mobile phones.

eLeader's software encompasses smartphone systems for Retail Mobile Sales Force Automation (mSFA/CRM), Field Force Management (FFM/FFA), Mobile Business Process Management (mBPM) and other solutions for the rapidly growing smartphone market.
